

A diagram illustrating a set of three horizontal lines. All three lines originate from a single vertical line on the left. The lines are horizontal and extend to the right. Each line has a small square marker at its starting point on the vertical line. The lines are positioned at different vertical heights, with the top line being the highest, the middle line in the center, and the bottom line being the lowest. The lines are dark blue, and the square markers are also dark blue. The background is white.
